

# Manav Patel

(343) 987-5270 | [manavpatel731@gmail.com](mailto:manavpatel731@gmail.com) | [Linkedin](#) | [Github](#)

## QUALIFICATIONS SUMMARY

---

- Junior Web Developer / Full Stack Developer with **2+ years** of hands-on experience **designing, building, and shipping public-facing, content-driven websites** and customer-facing **web applications** using **React, TypeScript, Node.js, Java** and **AWS**.
- **AWS Certified Solutions Architect** with working knowledge of cloud fundamentals, **RESTful API integration** and end-to-end testing with **Playwright**, backed by a solid foundation in **Git**-based collaborative workflows and **Agile delivery**.
- Curious, growth-minded contributor who uses **AI-assisted development tools** (Claude Code, GitHub Copilot) to build clean, accessible, scalable solutions across the full development lifecycle.

## TECHNICAL SKILLS

---

**Programming Languages:** HTML5, CSS3, JavaScript, TypeScript, Java, Python, C#, SQL

**Frameworks & Technologies:** React, Astro, Node.js, Spring Boot, .NET, Tailwind CSS, Preline UI, Bootstrap, SASS

**Testing:** Playwright, Unit Testing, TestNG, JUnit, Mockito

**Databases & CMS:** MySQL, Oracle, PostgreSQL, MongoDB, Sanity (Headless CMS)

**Cloud & DevOps:** AWS (Lambda, EC2, S3), Docker, Jenkins, GitHub

## WORK EXPERIENCE

---

### Full Stack Developer

TechMero Pvt. Ltd., Gujarat, India (Remote)

Oct 2025 – Present

*Technologies:* **React, TypeScript, Java, Spring Boot, Node.js, SQL Server, MongoDB, AWS (Lambda, EC2, S3), REST APIs, Git**

- Design and build full-stack financial-sector web applications, developing responsive **React** and **TypeScript** front-ends alongside **Java Spring Boot** and **Node.js** backend services.
- Architect and maintain **RESTful APIs** and **relational/NoSQL** data layers across **SQL Server** and **MongoDB**, ensuring reliable data flow between front-end clients and backend services.
- Deploy and scale services on **AWS (Lambda, EC2, S3)** managing cloud infrastructure.
- Lead code reviews and partnered with different teams to translate business requirements into production-ready features.

### Software Developer Intern (Part-time)

Jan 2022 - Dec 2022

- Engineered scalable **Node.js microservices** on **AWS Lambda**, integrating **SQL** and **MongoDB (NoSQL)** data stores to support high-performance financial-sector applications.
- Authored **RESTful API documentation** to industry standards, easing integration for teams.

### Front-End Developer Intern

Interact Health PRO, Toronto, ON (Remote)

Feb 2025 - May 2025

*Technologies:* **React, TypeScript, HTML5, CSS3, REST APIs, Git**

- Built and maintained responsive **React components** in **TypeScript** - including a patient dashboard, appointment scheduling calendar and secure messaging interface for a healthcare patient-engagement platform, align UI patterns with WCAG standards across user flows.
- Integrated **RESTful APIs** powering appointment booking, lab-result retrieval, and notification features, collaborating with backend and QA teams in an **Agile/Scrum** environment across sprint cycles.
- Participated in code reviews and maintained clean **Git** branching workflows.

### Software Developer Trainee

Access Computech Pvt. Ltd., Gujarat, India

Jun 2023 - Dec 2023

*Technologies:* **C#, .NET, ASP.NET, VB.NET, MySQL, Oracle, SQL**

- Delivered a customer-facing barcode management application end-to-end - from responsive frontend architecture to **.NET backend** and **database layer** - reducing data-capture processing time by **40% across 3 live client deployments**.
- Optimized **SQL** and **Oracle** stored procedures against a **5M+** record customer dataset, improving query performance by **20%**, and contributing to a **12%** increase in customer retention.

- Owned a **client barcode software project** independently from scratch to end. Delivered a robust solution that improved event data capture and management, managed the project end-to-end lifecycle.

## Front-End Developer Intern

Horizontal Digital, Gujarat, India

Jan 2023 - May 2023

*Technologies: React, TypeScript, Node.js, SASS, Postman, Bootstrap, Figma, Git*

- Built responsive **React components** using **TypeScript** and **HTML5/CSS3**, driving a **35%** lift in user engagement and cutting page load times by **20%** through **REST API** performance tuning.
- Translated **Figma** design specifications into responsive interfaces using **SASS** and **Bootstrap**.
- Integrated and tested **RESTful APIs** with **Postman**, implementing data fetching, error handling and loading states across components to ensure reliable client-server communication and drive to **20%** load-time improvement
- Containerized React application modules with **Docker** and configured **Kubernetes** deployment manifests, improving environment consistency across development, staging and production.

## PROJECTS

---

### Personal Portfolio & Blog | [Live](#)

*Technologies: Astro, React, TypeScript, Tailwind CSS v4, Preline UI, Sanity (Headless CMS), Playwright*

- Built a production-ready portfolio and blog site with **Astro** and **React islands** in strict **TypeScript**, shipping a zero-JavaScript-by-default static architecture that hydrates React only where interactivity is needed.
- Integrated **Sanity** as a **headless CMS** with graceful fallback rendering, enabling content updates without touching code or redeploying, and styled an accessible UI with **Tailwind CSS v4** and **Preline UI components**.
- Established end-to-end test coverage with **Playwright** across core user flows and build to accelerate architecture decisions, debugging and test authoring; deployed live on Vercel.

### Drive Watch System | [Code](#)

*Technologies: Python, OpenCV, Keras, CNN Classifier, Pygame*

- Developed a real-time monitoring system to detect driver action, processing 30 frames per second.
- Defined and optimized an action-detection threshold, achieving a **95%** accuracy rate in triggering timely alarms.

### Ecospace - Digital Marketplace for Eco-Friendly Products | [Code](#)

*Technologies: Python, TypeScript, Docker, Flutter, MySQL, PostgreSQL, Figma*

- Architected “Ecospace” as a full-stack e-commerce marketplace, connecting a **Flutter** mobile app and **TypeScript** web client to a **Python** backend, with **MySQL** and **PostgreSQL** managing a multi-vendor product catalog and order data.
- Built the core shopping flow - product discovery and search, cart, secure checkout, and order tracking, a design system, letting users browse and purchase eco-friendly products across mobile and web.
- Containerized backend services with **Docker** for consistent deployment and implemented secure transaction handling and intuitive navigation, improving user experience.

## CERTIFICATIONS

[AWS Certified Solutions Architect - Associate](#)

## EDUCATION

---

### P.G. Diploma: Full Stack Software Development

Jan 2024 - Aug 2025

Lambton College (Ottawa), Ontario | GPA: 3.62/4.0

### Bachelor of Engineering: Computer Engineering

Jul 2019 - Apr 2023

Gujarat Technological University, Gujarat, India | GPA: 3.5/4.0
